ABOUT US

Located in Klang, Selangor, Bukit Tinggi Medical Centre (BTMC) is a community-centric and family-friendly tertiary care hospital with expertise in a range of specialized fields. Driven by a team of dedicated medical professionals and staff, we aim to become the preferred healthcare provider for the community nearby with multidisciplinary approach on patient care.

With its 171 beds, our hospital is equipped with medical technologies of high standards as per medical requirements. Inclusive of 4 operating theatres, a cath lab, 7 ICU/CCU beds, and 24/7 Emergency Services, we strive to offer a wide range of comprehensive medical services and up-to-date healthcare solutions to patients under one roof.

The Intensive Care Unit (ICU) at BTMC consists of 7 fully functional beds with full ventilator support. Of these, 1 bed is located in the negative pressure room, which is capable of receiving highly infectious cases like Influenza, H1N1, pulmonary tuberculosis, and Covid 19. The capabilities and expertise of our highly experienced intensivists and anaesthesiologists, who are well versed in the latest treatment modalities, make BTMC the preferred choice for complex interventional life support.

Our accommodation facilities range from Two-Bedded, Four-Bedded, Suite Room, Single Deluxe, and Single Standard. We take thorough care in providing comfort to our patients during their recovery at BTMC.
